SUMMARY

Accomplished and growth-oriented **Python Developer** with over **10 months of hands-on experience** in developing and deploying **scalable APIs** and backend solutions. Currently engaged in a **live client project**, contributing actively to real-world problem-solving and solution deployment. In addition, successfully completed **5+ freelance projects**, including designing and implementing **user authentication systems** such as **login, registration, and signup functionalities**. Demonstrated ability to **collaborate across cross-functional teams**, adapt to **diverse work environments**, and **rapidly learn new technologies**.

EDUCATION

M.C.A(Master Of Computer Application)
LNCT University, Bhopal

📅 2023 - 2025 📍 Bhopal ,Madhya Pradesh

GPA
8.5 / 10.0

EXPERIENCE

Python Developer

Wyreflow Technology

📅 09/2024 - Present 📍 Bhopal, M.P.

Wyreflow offers a range of services including application services, ITES, mobility, cloud, big data, machine learning, and AI. Expanding its services to meet the needs of both US clients and government projects.

- Working on the backend of the application using Django and Python to create the APIs and maintaining the databases.
- Managing code versioning with GitHub and Bitbucket, and responsible for deployment to staging and production servers.
- Started as a backend developer and, from the second week, began contributing to frontend development using Angular and React.

Python Developer (Intern)

Signimus Technology

📅 05/2024 - 8/2024 📍 Indore, M.P.

Signimus Technology, offers IT services in Customized Web Design Solutions, Software Design & Development, Search Engine Optimization, Mobile Application Development, Engineering & 3D modelling services.

- Working on the backend part of the application in django using python to create the APIs and maintaining the databases.
- Not only involved in API development but also took charge of their maintenance, guaranteeing optimal performance while seamlessly integrating with databases.
- Working Closely with the frontend developers to develop and improve the user interface and to integrate the APIs.

Data Analyst – (Mentorship Intern)

1Stop.AI (Remote)

📅 02/2024 - 05/2024 📍 Bengaluru, K.A.

Successfully completed a remote internship focused on practical applications of Data science and machine learning.

Worked on **two major projects**:

- Credit EDA (Exploratory Data Analysis).
- Hate Speech Detection.

[Code With Stein](#)

CERTIFICATE

- Data Analysis Using Python from IBM ID Number: 99e74de6cad640dda387dcc863aa80bb
- Data Analytics and Visualization Job Simulation from Accenture
- CCNA (Cisco Certified Network Associate)
- CEH v11 (Certified Ethical Hacker) – Licensed Global Certificate

PROJECTS

Personalized Search History Feature: Bhopal

<https://shorturl.at/ifi2VH>

Created a Django Rest Framework API with a Save Search feature, offering personalized suggestions for users based on their past searches.

- Implemented a robust backend system that stores and retrieves user search history, enabling a seamless and personalized experience upon subsequent logins.

User Registration Email OTP & Token API Integration: Bhopal

<https://shorturl.at/HZaVh>

Constructed a Django Rest Framework API to seamlessly send email OTPs and tokens upon user registration, enhancing the user authentication process with secure and efficient communication.

- Utilized Django Rest Framework's robust features to implement a reliable mechanism for generating and dispatching email OTPs and tokens, ensuring a smooth onboarding experience for registered users.

Token-Based User Authentication System Bhopal

<https://shorturl.at/bdPSJ>

Implemented a token-based authentication system, enhancing user security and session management.

- Implemented a Django Rest Framework API with simplejwt for secure user authentication. This includes the generation of refresh and access tokens upon login, where the refresh token persists across pages, ensuring efficient and secure user sessions.

LinkedIn Profile Data Integration API Development Indore

¹<https://shorturl.at/kaGXq>

Integrated a Django Rest Framework API for streamlined access to LinkedIn profile data, enhancing user experience and information retrieval efficiency.

- Utilized Proxy Curl LinkedIn API provider to ensure secure and streamlined access to valuable profile information, optimizing the integration process for improved application functionality.

Advanced Filtering API for Optimized Data Retrieval Indore

<https://shorturl.at/pW5lq>

Developed a Django Rest Framework API with powerful filtering features for optimized data retrieval, enhancing overall system efficiency.

- Developed a Django Rest Framework API with advanced filtering for efficient data retrieval. The implementation enhances the system's overall functionality, providing a user-friendly experience.

Email Notification using Celery Indore

<https://shorturl.at/HZaVh>

Implemented an automated email notification system using Celery to send task notifications upon user registration. This solution ensures efficient and timely communication, significantly improving user engagement.

- Integrated with Django for seamless user account management and email delivery.
- Improved system performance by offloading email tasks to a dedicated task queue.
